<https://jdecristi.com/>

Dedicated Frontend Developer that is obsessed with frontend technologies like Vue.js and React.js. A year of experience constructing glamorous UIs and rearchitecting frontend codebases while maintaining learning more frontend techniques, scaling solutions, and architecture styles. Plagued with the urge to tinker, figure things out, and build enterprise-level user experiences.

Front-end Projects

Opensea Clone:

- Developed an NFT Marketplace with Typescript, Next.js, Thirdweb, and Firebase
- Interacted with Firebase SDK, to set up custom user accounts and log in with Metamask.
- Allowed logged-in users to Mint, Sell, and Buy NFTs
- Link: <https://opensea-clone-8sa9f9bnp-jdecristi.vercel.app/> (Desktop Only)

Weather App:

- Developed a responsive weather app using Typescript, Next.js, Openweather API, and Suncalc
- Used Openweather API for local weather information
- The app background will change based on time and local weather
- link: <https://jdecristi.com/projects/weather-app>

Tiles

- Developed with memory game Typescript and React.js
- Built score screen that saves user data on local machine without needing login
- Added custom star explosion animation
- link: <https://jdecristi.com/projects/tiles>

Professional Experience

PHP Developer at That's Us Technologies

June 2021 - July 2022 Tampa, FL

- Primary role as a full stack developer specializing in the front-end; I reorganized and rearchitected aspects of the front-end.
- Common tasks included building validation for forms and templates for landing pages.
- I worked with Vue.js, Scss, and Bootstrap on the front-end and Laravel PHP on the back-end.
